

HARSH BALLYAN

Digital Creative Designer

I'm a creative professional based in Delhi, specialising in video creation, graphic design, motion visuals, and social media branding. With 4+ years of experience, I help brands build strong digital identities through engaging content, AI-powered creative workflows, and performance-focused design strategies.

Coming from a law background, I bring an analytical approach to creative problem-solving — combining visual storytelling with branding and audience engagement to create content that delivers real business impact.

My expertise focuses strongly on AI-driven video creation and creative automation. I work with tools like Supademo, Jitter, Google Flow, Grok, Wondershare Pro, Canva AI, Character.AI, Neolemon, and Hera AI to create modern video content, motion graphics, ad creatives, and branded social media campaigns.

In addition to creative production, I have experience in social media management, campaign planning, YouTube analytics, ad creatives, and digital branding — helping businesses improve their online presence and audience engagement across platforms.
